Design with Stone in Mind

Not only is natural stone the oldest and most reliable building material, it's also the best way to make a statement in your design. Rich textures and bold colors are just a few of the distinct elements that natural stone brings to a space. Each of the unique color lines has been carefully selected to meet the demands of any design scheme.

Projects Can Be LEED Certified

All New England thin stone veneer products are natural, recycled stones. Whether it's for a government building or historical restoration, this natural building material can assist with the LEED certification of your next project. Functionally, stone will retain heat in the winter and cold in the summer, enhancing energy efficiency.

Lightweight with the Beauty & Durability of REAL Stone

New England thin stone veneer gives the appearance of full-thickness stone without the additional weight. These natural stones are durable enough to withstand the harshest winters, yet light enough to be installed without a footing.

At STONEYARD® we pride ourselves in crafting all-natural, 100% real, thin stone veneer. We take America’s oldest building material and sort, split, and cut it for use in modern-day architecture and design. Thin stone veneer is used for homes, offices, hardscapes, landscaping, or any other project that demands the finest wall covering.

Corners are available in all colors and shapes.

Stones in photos have been field-trimmed. Depending on preference, more or less trimming may be required to achieve the desired look.

Natural stone varies in color, veining, and pattern from piece to piece. STONEYARD® is not responsible for photos used in color literature, on websites, or in emails to accurately reflect actual material. Photos are used to create a general idea or feel for the material and cannot be used for color matching.

*This product is HCA (Harsh Climate Approved). It has been subjected to numerous freeze-thaw cycles and can withstand the harshest climates (both hot and cold). Perfect for interior and exterior use in any region including applications below grade. Also suitable for use in water features, near salt water, and in areas where blowing sand is a concern. [www.stoneyard.com/hca](http://www.stoneyard.com/hca)
DESCRIPTION
Boston Blend™ Ledgestone Thin Veneer consists of a wide range of colors including gray, white, tan, pink, and black. The Ledgestone pattern of stone veneer consists of thin strips of natural stone. Sold as individual stones not stone panels. For product testing data visit www.stoneyard.com/astm.

DIMENSIONS
- Height: 1–4 inches
- Length: 4–12 inches
- Thickness: 1 inch +/- ¼ inch
- Weight: Less than 14 lbs per SF

PACKAGING
- Flat Crate: 168 SF (SKU# VTLFFW)
- Flat Box: 5 SF (SKU# VTLFFS)
- Corner Crate: 150 LF (SKU# VTLFCW)
- Corner ½ Crate: 75 LF (SKU# VTLFCH)
- Corner Box: 5 LF (SKU# VTLFCS)

PROFILE
- Colors: Gray, tan, white, beige, blue, pink, black
- Finish: Split, textured face

APPLICATIONS
This product is HCA (Harsh Climate Approved). It has been subjected to numerous freeze-thaw cycles and can withstand the harshest hot, cold, or wet climates. Perfect for interior and exterior use in all regions including applications below grade. Suitable for use near salt water, water features, and in areas where blowing sand is a concern. www.stoneyard.com/hca

INSTALLATION
Thin Veneer installation information is available on our website www.stoneyard.com/instal. A mock-up is recommended to help in all design decisions including grout color, joint size (dry-laid, standard, or wide), and desired finish. www.stoneyard.com/mortar

LEED® CERTIFICATION & ENERGY EFFICIENCY
Whether it’s for a commercial building or historical restoration, this natural building material can assist with the LEED certification. Functionally, stone will retain heat in the winter and cold in the summer, enhancing energy efficiency. www.stoneyard.com/architect

CORNERS
Matching 90° corners are available in all colors and shapes. When other angles are needed, the installation options are weaving (alternating flats) or miter cutting flat pieces to wrap the corner. www.stoneyard.com/corner

Natural stone varies in color, veining, and pattern from piece to piece. Profile
Colors: Light gray, black, white, beige, tan, and blue
Finish: Natural, aged face

Applications
This product is HCA (Harsh Climate Approved). It has been subjected to numerous freeze-thaw cycles and can withstand the harshest hot, cold, or wet climates. Perfect for interior and exterior use in all regions including applications below grade. Suitable for use near salt water, water features, and in areas where blowing sand is a concern. www.stoneyard.com/hca

Installation
Thin Veneer installation information is available on our website www.stoneyard.com/install. A mock-up is recommended to help in all design decisions including grout color, joint size (dry-laid, standard, or wide), and desired finish. www.stoneyard.com/mortar

LEED® Certification & Energy Efficiency
Whether it’s for a commercial building or historical restoration, this natural building material can assist with the LEED certification. Functionally, stone will retain heat in the winter and cold in the summer, enhancing energy efficiency. www.stoneyard.com/architect

Corners
Matching 90° corners are available in all colors and shapes. When other angles are needed, the installation options are weaving (alternating flats) or miter cutting flat pieces to wrap the corner. www.stoneyard.com/corner

Natural stone varies in color, veining, and pattern from piece to piece. STONEYARD* is not responsible for photos used in color literature, on websites, or in emails to accurately reflect actual material. Photos are used to create a general idea or feel for the material and cannot be used for color matching.
Boston Blend™ Ashlar Thin Veneer is taller than Ledgestone veneer with a roughly rectangular shape. The stone face has been split revealing the vibrant and more varied colors of the stones inner grain. Colors consist of dark gray, white, beige, light gray, and blue. Sold as individual stones not stone panels. For product testing data visit www.stoneyard.com/astm.

- **Weight:** Less than 14 lbs per SF

**PACKAGING**

- **Flat Crate:** 168 SF ([SKU# VTDFFW](http://www.stoneyard.com/products/flat-crate))
- **Flat Box:** 5 SF ([SKU# VTDFFS](http://www.stoneyard.com/products/flat-box))
- **Corner Crate:** 150 LF ([SKU# VTDFCW](http://www.stoneyard.com/products/corner-crate))
- **Corner ½ Crate:** 75 LF ([SKU# VTDFCCH](http://www.stoneyard.com/products/corner-1-2-crate))
- **Corner Box:** 5 LF ([SKU# VTDFFS](http://www.stoneyard.com/products/corner-box))

**PROFILE**

- **Colors:** Gray, tan, white, beige, blue, pink, black
- **Finish:** Natural, aged face

**APPLICATIONS**

This product is HCA (Harsh Climate Approved). It has been subjected to numerous freeze-thaw cycles and can withstand the harshest hot, cold, or wet climates. Perfect for interior and exterior use in all regions including applications below grade. Suitable for use near salt water, water features, and in areas where blowing sand is a concern. [www.stoneyard.com/hca](http://www.stoneyard.com/hca)

**INSTALLATION**

Thin Veneer installation information is available on our website [www.stoneyard.com/install](http://www.stoneyard.com/install). A mock-up is recommended to help in all design decisions including grout color, joint size (dry-laid, standard, or wide), and desired finish. [www.stoneyard.com/mortar](http://www.stoneyard.com/mortar)

**LEED® CERTIFICATION & ENERGY EFFICIENCY**

Whether it’s for a commercial building or historical restoration, this natural building material can assist with the LEED certification. Functionally, stone will retain heat in the winter and cold in the summer, enhancing energy efficiency. [www.stoneyard.com/architect](http://www.stoneyard.com/architect)

**CORNERS**

Matching 90˚ corners are available in all colors and shapes. When other angles are needed, the installation options are weaving (alternating flats) or miter cutting flat pieces to wrap the corner. [www.stoneyard.com/corner](http://www.stoneyard.com/corner)

---

Natural stone varies in color, veining, and pattern from piece to piece. Photos are used to create a general idea or feel for the material and cannot be used for color matching.
**Colonial Tan™ Round**

**PRODUCT SPECIFICATION & DATA SHEET**

**DESCRIPTION**

Colonial Tan™ Round Thin Veneer has the irregular outside shape of a smooth mosaic pattern, with the depth and impact of rounded stones. Its rustic qualities lend themselves well to an Old-World style. Colonial Tan™ is a natural stone that consists of radiant browns, beiges, tans, and light grays accentuated by gold and silver specks. These earthy tan colors give your project a fresh, unmistakable look. Sold as individual stones not stone panels.

**DIMENSIONS**

- **Facing Area:** 0.25–1.25 SF
- **Size Range:** (6 inches x 6 inches) to (11 inches x 16 inches)
- **Thickness:** 1 inch +/- ¼ inch
- **Weight:** Less than 14 lbs per SF

**PACKAGING**

- **Flat Crate:** 168 SF (SKU# VTDCFW)
- **Flat Box:** 5 SF (SKU# VTDCFS)
- **Corner Crate:** 150 LF (SKU# VTDCCW)
- **Corner ½ Crate:** 75 LF (SKU# VTDCCH)
- **Corner Box:** 5 LF (SKU# VTDCCS)

**PROFILE**

- **Colors:** Brown, beige, tan, gold, light gray
- **Finish:** Natural, aged face

WWW.STONEYARD.COM/CTR
Personalize Your Design

When designing your home or commercial space, every structure has unique design elements. Sometimes a little customization is just what is needed to make the space truly your own. A great way to do this is with the use of natural stone. By blending different colors and shapes of thin veneer, you can create your own unique work of art.
Thin veneer is available in both flats and matching corners for all colors and shapes. The flat material is sold by the square foot (sf) and available in boxes and crates. Corners are sold by the linear foot (lf) and are available in boxes, half crates, and full crates. Each crate and box is carefully packed and shipped to authorized resellers throughout the USA. www.stoneyard.com/packaging

### Packaging

**Boxes**
- Flats: 5 sf
- Corners: 5 lf
- 18 boxes per pallet

**Crates**
- Flats: 168 sf
- 14 layers, 12 sf per layer
- Corners: 150 lf or 75 lf

### Corners

All of our thin veneer options are available in both flats and matching 90˚ corners. When other angles are needed, the options for installation are weaving (alternating flats) or miter cutting flat pieces to wrap the corner. www.stoneyard.com/corner

### Joint Options

When it comes to installing thin veneer, one of the aspects that can make the biggest effect aesthetically is the last step in the process: jointing. Below are the most common joint techniques used by masons during the installation process. A mock-up is typically created to help in all design decisions, including grout color, joint size, and desired finish. www.stoneyard.com/mortar

**Dry-Laid**
- With the dry-laid technique, stones are installed with no grout between pieces. This installation technique requires the most trimming.

**Standard**
- Standard grout joints are ⅜–¾ inch wide. Grout is typically recessed approximately 1/2 inch from the stone face. The amount of trimming or shaping required is moderate.

**Wide**
- With a wide joint installation the stones are spaced more than 1 inch apart and the grout is more pronounced. Typically seen in historic renovations, this technique requires the least amount of trimming.
ARCHITECTURAL TOOLS

CAD DETAILS

The data-rich BIM (Building Information Model) Objects are used in 3D CAD drawings to increase productivity in the building and design process. These objects allow designers and architects to use actual natural stone images in the drawings to get a better grasp on the project and overall design.

3-PART SPEC

This specification has been prepared to assist design professionals in the preparation of project specifications. It follows guidelines established by the Construction Specifications Institute (CSI) and therefore may be used with most master specification systems with minor editing.

PROJECT VISUALIZER

Can't make up your mind on which stone will look the best with the color of your house? Now you can see YOUR space with ALL of the different stone veneer options without any work! Our Project Visualizer allows you to upload a picture of your space, set the area, and try out different colors and shapes. It's a powerful and handy tool for anyone who wants to see a "before and after" visualization of their project.
Thin Stone Veneer Installation System by LATICRETE®

Perfect for All New England Stone Veneer:

- Boston Blend™
- Colonial Tan™
- Greenwich Gray™
- Newport Mist™
- Vineyard Granite™
- Nantucket Brown™
**MVIS™ Air & Water Barrier**

A single component, load bearing, vapor permeable, fluid applied, waterproofing, crack-isolating, air barrier membrane. LATICRETE® MVIS™ Air & Water Barrier produces a seamless, monolithic, elastomeric coating and bonds directly to a wide variety of substrates. A vital component of MVIS designed to enhance building longevity, save energy, and increase building occupant comfort. Install Stoneyard.com Thin Veneers in 1 - 2 hours.

- Designed for use as an air and water barrier behind most exterior wall claddings
- Excellent bond strength
- May contribute to overall building energy efficiency
- Easy to cleanup, with water

**Packaging Commercial Unit**

- 5 gallon (18.9 l) pail liquid; 36 units per pallet

Thin Veneer Installation Instructions for the LATICRETE® MVIS™ System

This guide provides a basic overview of materials and installation guidelines for your Stoneyard.com project. The following guidelines do not encompass all project conditions, nor do they replace general installation knowledge. For more assistance on designing with thin veneers, visit www.stoneyard.com.

For more information on LATICRETE® installation materials, visit www.laticrete.com/mvis.

Trimming and Prep
Perhaps the most efficient method for trimming thin veneer is through the use of a 4" (1 cm) angle grinder equipped with a diamond blade (figure A). Cuts made at an angle from the back (awn) side at 1/2" (12 mm) depth will allow the stone to be “snapped” with a small hammer along the cut line, leaving a natural edge on the front side. Ensure that units are clean of latex, loose concrete, and any film that could impede bond.

Substrate Prep
For moisture and air filtration protection, coat the approved substrate with LATICRETE® Air & Water Barrier. First, verify that the substrate is properly prepared and fully cured. Apply the first coat at 15 - 22 mils and allow to fully cure (figure B). Apply a second coat. LATICRETE® Air & Water Barrier will go from a light sage green to a dark olive green when fully cured. Seal all penetrations, including mechanical anchors, brick ties, furring strips, finish cladding supports, and other penetrations, with LATICRETE® Air & Water Barrier.

Setting
Using a flat trowel, apply a thin coat of LATICRETE® Masonry Veneer Mortar to cover entire back of the veneer units (figure C). Spread additional mortar onto the back of the skim coated veneer sufficient to completely fill the space between the veneer and the substrate. Press the mortar covered back of the veneer against the substrate at the desired final position. Slide the unit roughly 1" (25 mm) diagonally while maintaining even pressure (figure D). Take care to keep the joints between the stones consistent and to stagger the vertical joints. Remove excess mortar from the joints prior to setting the next piece (figure E). Periodically pull a piece of stone off the wall to ensure that there is 100% coverage of the mortar between the stone and the substrate (figure F).

Pointing Mortar
Dampen the stone surface with water. After all of stones have been set, LATICRETE® Masonry Pointing Mortar can be applied to the joints (figure G) via a grout bag or pointing trowel. Work your way through the field from bottom to top, forcing the mortar into the joints or any voids that may exist. Note that joint treatments vary by region and individual preference. Take into account the joint mortar depth required by your specific job as you work your way through the field. If you mortar lands on the face(s) of the stone during the course of installation, allow it to dry sightly and then brush or sponge off any residue. When the mortar becomes firm to thumbsprint hardness (10 - 60 minutes, depending on climate and temperature), trowel, rake, and/or brush to the desired finish. Finish with a brush or whisk broom.

THE LATICRETE ADVANTAGE

1. MVIS™ Air & Water Barrier
2. MVIS Veneer Mortar
3. Adhered Veneer
4. MVIS Pointing Mortar

THE CHALLENGE
The explosive increase in popularity of adhered masonry veneer facades has created a need for higher performance, factory produced installation materials to ensure consistently high quality installations.

Up to now, the installation of adhered masonry veneers has required the use of site-mixed Type S or Type N mortars — materials that are subject to large variations in consistency, quality and performance and which also limit the installation technique to that of traditional masonry.

THE SOLUTION
Realizing these needs, and based on our globally proven technology, LATICRETE has developed an installation system that provides a permanent, high strength installation that is freeze/thaw stable and protected from water intrusion.

Architectural details are offered at www.laticrete.com/MVIS to help design professionals, contractors and installers understand the range of possible applications — and appropriate products and techniques which will assure long-term performance on projects of all types.

LATICRETE Offers The Best Warranties In The Industry
